

WOJCIECH MAĆKOWIAK

C++ Software Engineer at Nokia, Embedded Software Engineer at AIOTA

+48 792 811 166 @ wojciech.mackowiak24@gmail.com
https://linkedin.com/in/womackow/ Cracow

SUMMARY

Software Engineer (C++/Embedded) with a deep passion for low-level technologies. As an ambitious, growth-oriented engineer and student, I enthusiastically embrace new challenges whenever the right opportunity arises. While low-level development was my first passion and the driving force that drew me to the tech industry, I am actively expanding my expertise to include AI-driven solutions during my Master's studies at AGH University to stay aligned with current market trends. What interests me most in coding is optimization - I am fascinated by its underlying depth and the intricate complexity of the entire system. I really enjoy getting deep into the system architecture and understanding its core mechanics, turning every hardware constraint or performance bottleneck into an opportunity to craft a truly elegant and efficient solution.

EDUCATION

Master of Engineering, Computer Science - Machine Learning and Artificial Intelligence

AGH - Faculty of Computer Science
02/2026 - Present Kraków, Poland

- AI in Telecommunication Systems - DCI AE-Compression, Deep RL MAC Packet Scheduler, Deep RL MCs Adaptation

GPA 4.63 / 5

Master of Engineering, Computer Science in Engineering

AGH - Faculty of Metals Engineering and Industrial Computer Science
03/2025 - 08/2025 Kraków, Poland

GPA 4.71 / 5

Bachelor of Engineering, Computational Engineering

AGH - Faculty of Metals Engineering and Industrial Computer Science
09/2021 - 02/2025 Kraków, Poland

- Performance analysis of CPUs and GPUs using CUDA technology. Self-written Ray Tracing

GPA 4.67 / 5

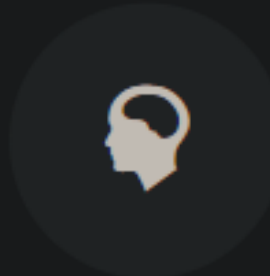

EXPERIENCE

C++ Software Engineer	07/2025 - Present
Nokia	Kraków, Poland
- Project: 5G New Radio Ue Simulator - Nokia In-House Tools - RAN - Layer: L2 - MAC, RLC, PDCP, SDAP	
C++ Student Intern	07/2023 - 06/2025
Nokia	Kraków, Poland
- Project: 4G LTE Ue Simulator - Nokia In-House Tools - RAN - Layer: L2 - MAC, RLC, PDCP	
Embedded Software Engineer	04/2026 - Present
AIOTA AGH	Kraków, Poland
- Bluetooth Low Energy - Nordic Semiconductors - Zephyr	
Embedded Software Engineer	10/2025 - 03/2026
E-Moto AGH	Kraków, Poland
- stm32 - HAL / bare metal programming	

INTERESTS

Embedded Systems
I enjoy creating my own IoT solutions for real world problems

HPC C++ / CUDA
Low-Level optimizations for performance has always attracted me the most in programming
